

# IBI-aws Admin

*IBI-aws Admin* is divided into three main parts that are based on the structure of the *Microsoft Management Console*, which is well known in the IT field.

The navigation panel is on the left-hand side and gives access to the [message groups](#), [templates](#), [static messages](#), [applications pool](#), [network pool](#), [e-mail pool](#) and the [attribute pool](#).

The center section of the application displays the properties or content of a selected object.

*Actions* corresponding to selected content such as *Edit* and *Remove* are shown in the right-hand panel.

Information appears when necessary in the lower right-hand corner under *Actions*.
